PROFILE

I'm a Software Developer with experience in front-end and back-end technologies, focusing on React, Next.js, TypeScript, C#, and SQL. I've worked on creating scalable web applications, building REST APIs, and modernizing legacy systems. I specialize in building clean, responsive user interfaces using HTML, CSS, SCSS, and JavaScript, while ensuring performance optimization and maintainability.

PROFESSIONAL EXPERIENCE

FRONT-END DEVELOPER

Growmate – **IRN** (Oriente, Lisbon) | 2025 (June) –PRESENT

- Contributed to the development of a greenfield enterprise web app, architected to handle high traffic and transaction volumes.
- Built scalable front-end architecture using React (v18/v19) and Next.js, optimizing performance and load time by 25–30%.
- Designed and implemented a modular multi-step rendering system, reducing code duplication by 35% and improving extensibility.
- Enhanced authentication security and integrated Keycloak for secure token management, alongside payment system integration.
- Integrated mosparo to reduce spam submissions by 70%+ and ensure bot protection during stress testing.
- Worked closely with back-end teams to ensure secure API communication, and verified databases to resolve cross-layer issues.
- Contributed to unit testing, CI/CD pipelines, and Agile/Scrum practices for quality code and production readiness.

FULL-STACK DEVELOPER

Neotalent – **VORTAL** (Lisbon, Portugal) | 2024 (May) –2025 (June)

- Collaborated with the operations team, managing tickets, troubleshooting, and fixing incidents in C#, TypeScript, and React for VORTAL's enterprise-level platform.
- Developed and maintained full-stack solutions using ASP.NET for the backend and React for the frontend, ensuring high-quality and scalable features.
- Led incident resolution and bug fixing in a fast-paced environment, minimizing downtime and ensuring system stability.
- Implemented and optimized CI/CD pipelines with Azure DevOps, improving deployment efficiency and code reliability.
- Utilized GIT for version control, ensuring clean code management and smooth collaboration within the development team.
- Collaborated with cross-functional teams to resolve complex issues, ensuring alignment across development, operations, and infrastructure.
- Contributed to system enhancements by improving platform performance and refactoring legacy code, ensuring better maintainability and scalability.

BACK-END DEVELOPER

VIA CONSULTING (Lisbon, Portugal) | 2023 (January) –2024 (May)

- Developed REST APIs using C# and Java to integrate systems for clients such as Millenium BCP, AGEAS, and SIBS.
- Built and deployed a RESTful API for Millenium BCP, enabling SOAP communication with AGEAS servers, delivering seamless responses using Azure DevOps, CI/CD pipelines, and version control with Git and SVN.
- Led the integration of Rundeck jobs to automate the process of detecting and processing files (e.g., MOVEMENTS, transfers), storing data in a MySQL database.
- Contributed to the development of a virtual wallet solution for Medis, enabling users to receive and use points/cash for services, enhancing customer experience.
- Ensured smooth deployment workflows and efficient code management with Git, SVN, and Azure DevOps, using CI/CD pipelines for seamless integration and delivery.
- Collaborated with cross-functional teams to design, implement, and test the integration processes between various systems and databases.
- Gained leadership experience by managing and mentoring a small development team, overseeing daily operations, and ensuring project milestones were met on time.

FRONT-END DEVELOPER - INTERN

EMVENCÍ - CYBERSECURITY CLOUD (Lisbon, Portugal) | 2022 (March) –2022 (August)

- Assisted in front-end development using TypeScript, Angular, SCSS, and HTML, following CI/CD workflows and Git version control.
- Focused on bug fixing and UI maintenance, ensuring a smooth and consistent user experience across the platform.
- Supported the modernization of the old website UI into a new Angular-based design, applying atomic design principles for modular and reusable components.
- Improved the maintainability and scalability of the front-end codebase through structured component architecture.
- Collaborated with the development team to ensure UI consistency and support the transition to a modern design system.

FRONT-END DEVELOPER - INTERN

ARQUICONSULT (Lisbon, Portugal) | 2020 (March) –2020 (August)

- Worked on back-end development using C#, ASP.NET Core, and Entity Framework to build the backoffice application for client-side integration with Xamarin.
- Created Razor Pages for the backoffice interface, allowing users to interact with the system and input data.
- Integrated Google Maps API with jQuery to enable interactive mapping of parks and trees, saving data into a SQL Server database.
- Contributed to API development for client-side communication between the back-office system and Xamarin mobile application.
- Learned version control with Git and gained experience with Visual Studio and C# in a real-world CI/CD development environment.

EDUCATION

CTESP (2020 – 2022)

ISTEC Lisbon, Portugal

- Gained strong foundations in UI/UX design principles, usability patterns, and human-centered design through hands-on academic projects.
- Applied UX methodologies to improve user flows, interface clarity, and overall user experience.
- Strengthened analytical thinking and problem-solving skills through team-based, real-world development assignments.
